Bluestone

The Convesso Concavo apartment towers are a stunning addition to Melbourne's world class water-front promenade. While Concavo is still under construction, the elegant Convesso block of luxury apartments has been completed. Convesso comprises six distinctive areas: lobby area with retail facilities, apartments which face Bourke Street, luxury water-front apartments, tower apartments, penthouses and pool, and a gymnasium and public terrace.

Builder Lend Lease appointed leading specialist stone supplier and processor Baron Forge to coordinate acquisition and installation of almost 15,000 square metres of over 50 different hard surface finishes sourced from a variety of major manufacturers based in Europe and Asia, principally Italy, Spain and China.

Baron Forge processed slab and façade materials and met the required stringent

deadlines. Award winning architects Bates Smart created the superb architecture which blends seamlessly into Victoria harbour. 🏆
