

Australian exports of natural stone

WORDS Peter Halliday

Australian exports of natural stone in 2011 was a modest A\$13,837,541. This was a 10 per cent decline on the 2010 figure and was also lower than the 2009 value. A summary table of natural stone exports and the country of destination for the previous 10 years can be seen in Fig. 1 (opposite).

The Australian Harmonized Export Commodity Classification (AHECC) is used by exporters to classify goods. The AHECC classification is based on the six digit international Harmonized Commodity Description and

Coding System (HS) developed by the World Customs Organization (WCO) for describing internationally traded goods. The ABS extends the six digit international HS Code by two digits to provide a finer level of detail to meet Australian statistical requirements. The codes and descriptions of the relevant codes for natural stone can be seen in the Fig.3.

Queensland is the biggest state of origin for Australian stone exports, shipping over 47 per cent of the national total. New South Wales and Western Australia were the

next largest with a 14 per cent share each. The full details can be seen in Fig. 2.

In 2011 over 90 per cent of the value of Australian natural stone exports were shipped to only four countries, the biggest being China which received 67.5 per cent of the national total, valued at A\$9,342,647. Historically, Italy was the biggest importer of Australian natural stone until 2006. From 2007 to the present time, exports to China increased alongside a corresponding decrease in exports to Italy. China is the biggest global processing country for natural stone. Even Italian companies have stone processed in China. It is interesting to note however that exports to Italy almost doubled in 2011 over the 2010 year. A detailed breakdown of the top 4 destination countries and the state of origin can be seen in Fig. 4 (Readers can access this information on-line at infotile.com, under Advice Menu in Archived Articles – Stone imports and exports. ☺)
